Summary

Frontend and full stack developer with 10+ years of experience designing and delivering scalable web applications in the financial, video, and communications industries. Expert in React, TypeScript, and modern UI architectures. Skilled in microfrontend design, testing, and cloud-based deployments (GCP, Kubernetes). Strong collaborator with a focus on performance, code quality, and maintainable engineering practices. Experienced in leveraging AI-assisted coding tools (Copilot, Claude, Gemini) to improve productivity, automate code generation, and accelerate refactoring.

Technical Skills

Frontend: JavaScript, TypeScript, React, Redux, HTML, CSS, Tailwind, Material UI

Backend: Node.js, Express

Testing: Cypress, Jest, React Testing Library, Karma

Tools: Git, Webpack, TeamCity, Maven, Copilot, Claude, Gemini

Experience

- Senior Software Engineer – GFT Technologies | 2020 – 2025
 - Led frontend and full stack development for internal tools and trading platforms using React, Redux Toolkit, Tailwind CSS, Material UI, Node.js, Express.js
 - Created and deployed multiple React microfrontends to production.
 - Developed and maintained real-time trading dashboards with a custom rendering engine.
 - Implemented automated E2E and unit testing with Cypress and Jest.
 - Adopted AI-assisted tools (Cursor, Copilot) to speed up development, improve code consistency, and prototype new features faster.
- Senior Frontend Developer – Samsung Poland | 2019 – 2020
 - Developed tools for 5G network management using React, Redux, and TypeScript.
 - Managed monorepo component libraries with Lerna and Webpack.
 - Migrated core frontend systems from JavaScript to TypeScript.
- Frontend Developer – Brown Brothers Harriman | 2017 – 2018

- Built internal financial dashboards with Angular and Highcharts.
- Implemented new features, unit tests, and bug fixes to improve stability and UI responsiveness.
- Frontend Developer – Grand Parade (part of William Hill) | 2015 – 2017
 - Led frontend development for footballpools.com and other gaming products using Backbone and Gulp.
 - Mentored junior developers and improved build processes for CI/CD efficiency.
 - Created dynamic, animation-driven websites and betting dashboards.
- Full Stack Developer – Screen9 | 2014 – 2015
 - Built video streaming and management tools using Flask, AngularJS, and Python.
 - Developed customizable video gallery platforms and sign-language translation interfaces.
 - Maintained admin consoles and refactored legacy systems.
- Frontend Developer – Adrem Software | 2011 – 2013
 - Designed and implemented network monitoring dashboards and data visualizations using AngularJS, D3.js, and TypeScript.
 - Built mobile monitoring applications with jQuery Mobile.

Education

Master's Degree in Computer Science and Econometrics – Cracow University of Economics, 2011
